

VITOR VASCONCELOS

Software Engineer

About Me

Software Engineer with over 4 years of experience designing, developing, and maintaining scalable applications, enterprise automation, and microservices in mission-critical environments. Experience in Backend and Full Stack development using Python, TypeScript, Node.js, Next.js, SQL Server, MongoDB, and Prisma, as well as strong experience in Cloud Computing, Infrastructure as Code (Terraform and Ansible), and process automation.

Currently working at Santander, I develop solutions for automating and provisioning NoSQL database services through microservices, workflows, and integrations between distributed systems, ensuring scalability, security, and operational reliability.

I have experience leading technical initiatives, developing web applications, data pipelines, distributed system integrations, and business-oriented solutions.

Professional Summary

Santander Digital Services – 2025/05 - NOW:

- I've developed a REST API using Python (FastAPI) to integrate distributed systems and assist in automating:
 - NoSQL database provisioning in Cloud and On-Premise;
 - Sending Continuous Patching incident alerts.
- I've developed and maintained automations using Camunda, JavaScript, Rundeck/Ansible, and Shell Script.
- I've developed and maintained Infrastructure as Code automations using Terraform, GitHub Actions, Python, and Shell Script for cloud database provisioning.

MGITECH – 2022/01 – 2025/04:

- I've provided technical leadership for development projects, supporting developers and defining solutions for strategic demands.
- I've developed full-stack web applications using Next.js and TypeScript.
- I've developed APIs and backend services integrated with Power BI Embedded.
- I've created ETL automations in Python for processing and integrating corporate data.
- I've modeled and optimized SQL Server queries for large volumes of data.
- I've used Prisma ORM for data access management and database modeling.
- I've led the definition of architecture, code review, and continuous improvement of systems.

Skills & Technologies

Core Technologies:

TypeScript, Javascript, Python, SQL, NoSQL, AWS, Figma, GitHub, Power BI.

Additional Proficiencies:

Office Suite, Agile Methodologies, Team & Project Management, Continuous Integration & Deployment (CI/CD), Unit Testing, Terraform, Ansible.

Education

- Postgraduate in Software Engineering – University of Mogi das Cruzes (2024-2025)
- Bachelor's in Information Systems – University of Mogi das Cruzes (2018-2021)
- English Certification – CCAA (2018-2022, Advanced Level)

Languages

- English: Advanced (B2 Linguaskill - Cambridge)
