

VITOR VASCONCELOS

Full Stack Developer | Backend & Cloud Automation

4+ years of experience · Backend & Full Stack · Cloud (AWS) & IaC · Cloud Provisioning: 1 week to <1h · Technical Leadership

vitorvaske6@gmail.com | linkedin.com/in/vitor-hugo-vasconcelos | github.com/vitorvaske6 | vitor-vaske.com.br

Professional Summary

Software Engineer with 4+ years of experience designing, developing, and maintaining scalable applications, enterprise automations, and microservices in mission-critical environments. Specialized in Backend and Full Stack development with Python, TypeScript, Node.js, and Next.js, with strong expertise in Cloud Computing, Infrastructure as Code (Terraform, Ansible), and end-to-end process automation. Currently at Santander Digital Services, building automation and provisioning solutions for NoSQL databases through microservices, workflows, and distributed systems integrations, ensuring scalability, security, and operational reliability. Prior experience technically leading development teams and delivering business-driven Full Stack solutions.

Professional Experience

Santander Digital Services

May 2025 – Present

Infrastructure Automation Developer (Cloud & On-Premise)

- Built and maintain a REST API in Python (FastAPI) for distributed systems integration, supporting automation for NoSQL database provisioning (Cloud and On-Premise) and Continuous Patching incident alerting.
- Develop and maintain process automations using Camunda, JavaScript, Rundeck/Ansible, and Shell Script.
- Implement and maintain Infrastructure as Code (IaC) automations with Terraform, GitHub Actions, Python, and Shell Script, reducing cloud database provisioning time from up to 1 week to under 1 hour.

MGITECH

Jan 2022 – Apr 2025

Full Stack Developer & Technical Lead

- Technically led Full Stack development projects, supporting the development team and defining technical solutions for strategic business needs.
- Developed Full Stack web applications with Next.js and TypeScript, including backend APIs and services integrated with Power BI Embedded.
- Built ETL automations in Python for corporate data processing and integration, and modeled/optimized SQL Server queries for large data volumes.
- Used Prisma ORM for data access management and database modeling, with a focus on performance and integrity.
- Drove architecture definition, code review, and continuous improvement initiatives.

Technical Skills

Languages & Frameworks	Python, TypeScript, JavaScript, Node.js, Next.js, FastAPI
Databases & ORM	SQL Server, MongoDB, SQL, NoSQL, Prisma ORM
Cloud & Infrastructure	AWS, Terraform, Ansible, GitHub Actions, Rundeck, CI/CD
Automation & Integration	Camunda, Shell Script, REST APIs, Microservices, ETL
Tools & Platforms	Power BI, Power BI Embedded, Figma, GitHub, MS Office
Methodologies & Management	Agile Methodologies, Team & Project Management, Technical Leadership, Unit Testing, Code Review, Software Architecture

Education

- Postgraduate Degree in Software Engineering — Universidade de Mogi das Cruzes (2024–2025)
- Bachelor's Degree in Information Systems — Universidade de Mogi das Cruzes (2018–2021)

Languages & Certifications

- English: Advanced (B2 – Linguaskill, Cambridge)
- English Certification – CCAA (2018–2022, Advanced Level)
